Nevada Health Response provides update on mask guidance

CARSON CITY, NV — Today, Nevada Health Response provided an update on county risk levels as posted by the Centers for Disease Control and Prevention (CDC).

Esmeralda County is listed as having a high risk of transmission for the second week in a row, so vaccinated individuals will have to begin wearing masks indoors or in crowded outdoor settings again, beginning on Friday, November 12, 2021.

All other Nevada counties are listed as high transmission by the CDC and must continue to use masks in indoor settings.

To be able to lessen mask restrictions, counties need to remain at low or moderate transmission, as defined by the CDC, for 2 weeks in a row. Low transmission is defined as having less than 10 new cases per 100,000 persons in the past 7 days and less than 5% of tests resulting in positive cases in the past 7 days. Moderate is between 10 and 49.99 new cases per 100,000 in the past 7 days and between 5 and 7.99% of tests resulting in positive cases in the past 7 days.

Please review [UPDATED NEVADA COVID-19 GUIDANCE: Delta Variant, Vaccinations and Masks](#) for additional information on how this applies across the state.

The CDC recommended that everyone, including fully vaccinated individuals, wear a mask in public indoor settings in counties with substantial or high transmission. In line with [Emergency Directive 045](#), signed and effective May 3, 2021, the State of Nevada automatically adopted the latest CDC guidance related to masks as a statewide requirement.

Please note that some school districts and local governments have implemented mask requirements that may be more restrictive than those set forth in Directives 047 and 048.

For the latest information on current mitigation measures in place by county, visit [NV Health Response - Current Status](#).
